

LTS' testandgo™ healthcare kiosk provides Americans a convenient and accessible solution to receiving medical tests, harm reduction treatments, and preventative care products.

Leveraging the latest technology to inform its fully automated system, these kiosks improve health equity by bringing vital public health services closer to home.

Safe and Confidential.

Provides a safe and discrete way to obtain test results and medical products with advance data security used to safeguard personal information.

Easy and Flexible.

Promotes an inclusive user experience with multilingual instructions and widespread access to a variety of diagnostic and medical care items.

Accessible and Sustainable.

Operates 24/7 in easy to reach locations that maximize availability and ensure state-level readiness for future public health concerns.

testandgo™ Kiosks Healthcare Revolution in Action!

testandgo™ was developed by a group of visionaries at LTS (formally known as Longview International Technology Solutions) as the answer to the health equity issues they witnessed when providing COVID-19 support services to more than 55% of the U.S. population.

As a leading provider of healthcare IT solutions for both federal agencies and public organizations, LTS has more than 20 years of experience fusing technology, ingenuity, and human-centered experiences to tackle an array of equally complex public health issues.
